

What the trees keep (40 datasets per cell)

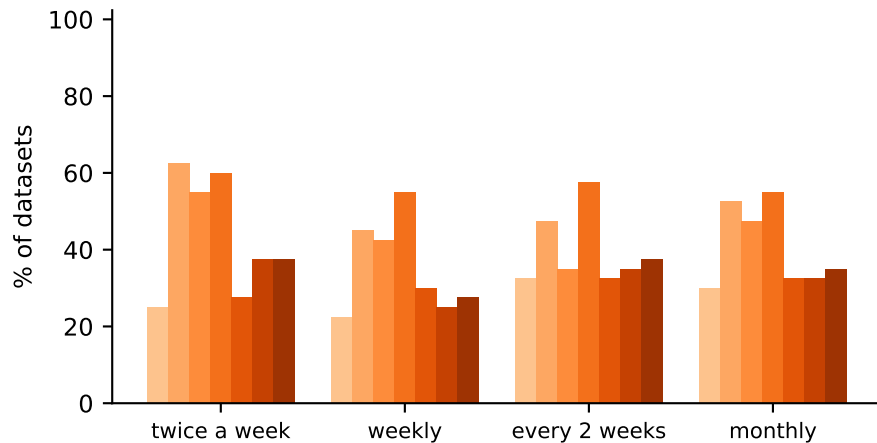

first split on x (edge 0.05)

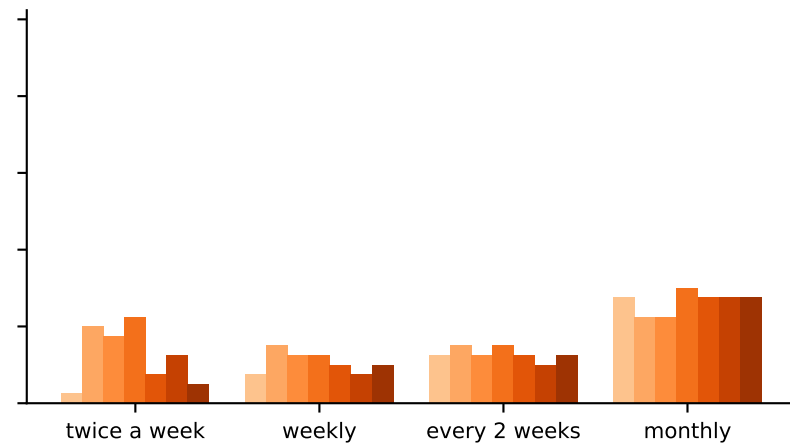

first split on x (edge 0.1)

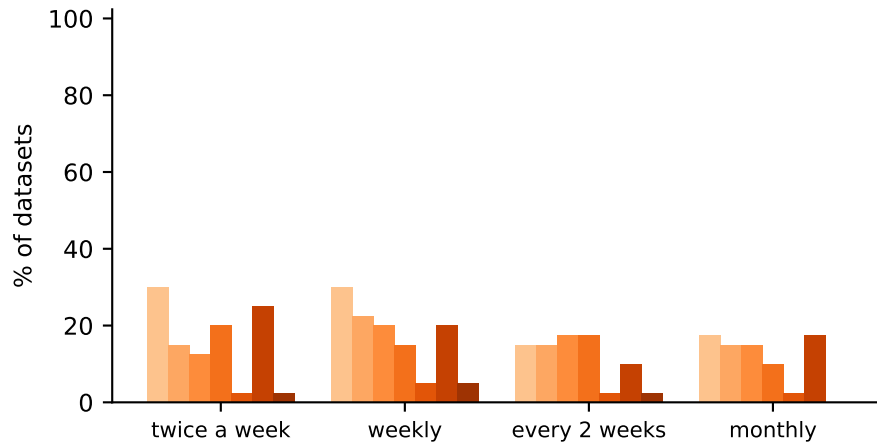

no split kept (edge 0.05)

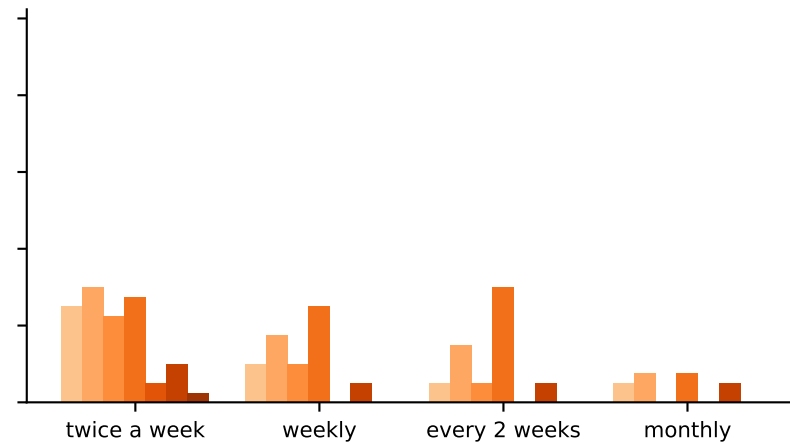

no split kept (edge 0.1)

second-level split kept (edge 0.05)

second-level split kept (edge 0.1)

- base
- smoothing $\kappa = 0.5$
- smoothing $\kappa = 0.25$
- gaussian smoothing $\kappa = 1$
- hurdle 2 s.e. below the root
- deciles + refinement + smoothing $\kappa = 0.25$
- deciles + refinement + hurdle below the root
